Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by CN 1137030, cited on enclosed PTO-1449 Form.

Claims are drawn to a composition comprising keratin and metal ions and preservative components (e.g. ammonium compounds).

CN 1137030 teaches a composition comprising keratin and metal ions and preservative components (e.g. ammonium compounds).

The claims are identical to the teachings of CN 1137030 and are, therefore, considered to be anticipated by the reference. Keratin is universally derived from hair, feathers, etc., and hence the source of the keratin even if silent in the reference is an inherent feature of the teachings in the reference. Also ammonium compounds are preservatives and even if the reference may be silent with respect to the tetraalkylammonium hydroxide it is inherent to the teachings of the reference because its structure is comparable to those disclosed by the reference.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
